

## Singleton

```
public class Singleton {
    private static Singleton instance;
    Singleton() {
        //
    }
    public static Singleton getInstance() {
        if(instance == null) {
            instance = new Singleton();
        }
        return instance;
    }
    public void print() {
        System.out.println("hello, im a singleton implementation");
    }
}

public class Main {
    public static void main(String[] args) {
        new Main().go();
    }
    void go() {
        Singleton singleton = Singleton.getInstance();
        singleton.print();
    }
}
```
